EDUCATION

Bachelor's Degree in Computer Science

Faculty of Computer Science, University of Central Oklahoma (UCO) • Oklahoma, USA • 2001 • [Show Certificates](#)

IT Specialist – Cyber Security

Loops Automation LLC

April 2025 – Present, Dubai, UAE

A. Level 1 & 2 support (IT)

- Diagnosing and resolving hardware, software, and network issues including system failures, application errors, and connectivity problems.
- Overseeing the installation, configuration, and maintenance of IT systems, including software updates, patch management, and system optimizations.
- Creating and maintaining detailed records of problems and their solutions, and contributing to a knowledge base for future reference and faster resolution.
- Assisting users with navigating technical processes and providing detailed instructions for problem-solving.
- Involved in backend support, dealing with server and database troubleshooting, and managing aspects like Active Directory, multi-factor authentication, and software license reconciliation.
- Engaging in preventive maintenance to ensure IT infrastructure runs smoothly and creating contingencies for potential issues.

B. Cyber Security (OT)

- Watch for unusual activity, analyse security alerts, and investigate incidents to identify and mitigate threats. This can involve reviewing logs from firewalls, email, and web servers.
- Assist in identifying and documenting security vulnerabilities, and potentially help in their remediation or implement countermeasures. This can include performing or assisting with penetration tests.
- Support the response to security breaches, documenting incidents and contributing to disaster recovery plans.
- Install and operate security tools like firewalls and encryption programs, and maintain existing security systems.
- Help ensure compliance with relevant regulations and industry standards, and promote security awareness training.
- Research and Development: Stay updated on the latest cybersecurity trends, technologies, and potential threats.
- Using the following tools:
 - **Endpoint Security:** This includes antivirus software, endpoint detection and response (EDR) solutions, and endpoint protection platforms, which safeguard individual devices like computers and servers.
 - **Network Security:** Tools like firewalls, intrusion detection/prevention systems (IDS/IPS), and network monitoring software are used to secure network infrastructure and traffic, detecting and blocking malicious activity.
 - **Vulnerability Management:** Vulnerability scanners, such as Nessus Professional and OpenVAS, identify weaknesses in systems and applications, allowing for proactive patching and mitigation.
 - **Application Security:** Tools like ZAP (Zed Attack Proxy) and SQLMap are designed to find and fix vulnerabilities within applications, including web applications and databases.
 - **Data Security:** Encryption tools and solutions for secure data storage are vital for protecting sensitive information from unauthorized access.
 - **Identity and Access Management (IAM):** These solutions, including authentication and authorization tools, control who can access specific resources within a network.
 - **Specialized Tools:** Other notable tools include Wireshark for network analysis, Metasploit for penetration testing, and Aircrack-ng for Wi-Fi security testing.

IT Software Developer

Emirates Schools Establishment

February 2018 - August 2023, Dubai, UAE

Updating LMS/ALEF website portal and import parent/student information in the system.

Installing/Configuring and fixing smart white board systems.

As part of Emirates Schools Establishment technical team, **responsible** for writing, testing, and maintaining **programs/Apps**.

Preparing the **server-side logic** of a web application, developing the application's **back-end** components, and linking it with other web services. Design and maintain programming scripts and codes to automate tasks.

Collaborate with cross-functional teams to define, design, and develop new **features** and fix **bugs** in existing software products. Responsible for writing **reusable, testable, and efficient** code — ensuring the application's **performance, security, and scalability**.

Compiling and assessing user feedback to improve software performance

Observing user **feedback** to recommend **improvements** to existing software products

Developing technical **documentation** to guide future software development projects

IT Help Desk & CS Representative

Higher Colleges of Technology

December 2009 - May 2017, Dubai, UAE

- Provided prompt technical support to end-users, addressing hardware, software, and network-related issues through various communication channels, including phone, email, and in-person interactions. **Resolved technical problems using analytical and problem-solving skills to identify root causes and implement effective solutions, minimizing disruptions to user productivity.**
- Managed help desk ticketing systems, including logging and prioritizing user requests, tracking progress, and ensuring timely resolution while maintaining accurate records and documentation. **Performed software installations, updates, and configurations, as well as hardware installations and upgrades, ensuring compatibility, functionality, and adherence to organizational standards.**
- Implemented security measures, such as antivirus software, firewalls, and access controls, to safeguard systems and data against unauthorized access, malware, and cybersecurity threats. **Collaborated with cross-functional teams to provide technical support during IT projects, contributing to successful implementation and integration of new systems or technologies.** [Show Certificate](#)

IT Help Desk & CS Representative

Tamouh Investments LLC

October 2006 - September 2009, Abu Dhabi, UAE

- Installed, configured, and set up laptops, PCs/desktops, printers, and peripherals for customers, ensuring proper functioning and compatibility with their IT environment. **Received incidents reported by users and promptly assigned them to the responsible staff, or escalated the issues to management for further investigation and resolution.**
- Provided training sessions to students and teachers, guiding them on the use of new technologies and ensuring they were equipped with the necessary skills to utilize the tools effectively. **Took responsibility for maintaining the SQL/mail server, ensuring its smooth operation and addressing any issues or performance concerns.**
- Assisted administrative staff in creating Excel and Access programs, leveraging technical expertise to develop customized solutions that streamlined workflows and improved productivity. **Proactively identified areas for improvement in procedures and processes, suggesting and implementing helpful enhancements to optimize efficiency and customer satisfaction.** [Show Certificate](#)

CERTIFICATIONS

IELTS Certification

International English Language Testing System (IELTS) • Dubai, UAE • 2017

The IELTS Certification improved my language proficiency, helping so much in communicating effectively international work settings and opening up more opportunities for career advancement and global collaboration. [Show Certificate](#)

Certified Business Professional - Customer Service Certification

International Business Training Association (IBTA) • Dubai, UAE • 2012

This Certification added so much advanced skills in providing exceptional customer service. It enhanced my ability to understand and address customer needs, resulting in improved client satisfaction and strengthened professional relationships. [Show Certificate](#)

E-Citizen Certification

ICDL E-Citizen • Dubai, UAE • 2012

The E-Citizen Certification added so much essential digital literacy skills, that helped in navigating and utilizing online platforms and services efficiently. This knowledge has been valuable in today's digital age, enhancing my productivity and effectiveness in various professional settings. [Show Certificate](#)

Cisco Certified Network Associate - CCNA Certification

Cisco Career Certification • Abu Dhabi, UAE • 2008

The CCNA Certification in Cisco networking has been instrumental in my career. It has added so much in-depth knowledge and expertise in managing and troubleshooting network systems, that helped in contributing to the smooth operation and optimization of network infrastructure. [Show Certificate](#)

CompTIA A+ Certified Professional Certification

CompTIA • Illinois, USA • 2006

The CompTIA A+ Certification has validated my comprehensive understanding of hardware and software. It has significantly enhanced my technical troubleshooting and support abilities, that added a valuable asset in resolving technical issues and maintaining optimal IT performance. [Show Certificate](#)

ICDL Certificate

International Computer Driving License • Abu Dhabi, UAE • 2004

The ICDL Certificate has been immensely beneficial to my career by enhancing my digital literacy skills. This certification has added so much comprehensive understanding of various computer applications and has improved my proficiency in using essential software programs such as word processing, spreadsheets, presentations, and databases. [Show Certificate](#)

Active Server Pages (ASP) Certificate

Al Khawarizmi Training Institute • Abu Dhabi, UAE • 2003

The ASP Certificate has added so much expertise in the ASP programming language. This knowledge has helped so much in developing dynamic and interactive web applications, expanding my capabilities as a developer. [Show Certificate](#)

Certified Professional Internet Application Developer

Oracle • Abu Dhabi, UAE • 2003

The certification as a Professional Internet Application Developer has established my expertise in building internet applications. This credential has played a crucial role in my career by showcasing my ability to develop robust web-based solutions and contributing to the success of various web development projects. [Show Certificate](#)

SKILLS

- HTML Boss
- CSS Specialist
- JavaScript Expert
- Java User
- Python Master
- Angular 12-17 Professional User
- Networking: TCP/IP, VLANs
- SQL, MySQL Manager
- Content Management Systems
- Responsive Designs & Forms
- Interpersonal Skills
- Flexibility, Planning & Organized
- Time Management
- Problem Analysis and Problem Solving
- Operating Systems: Windows, Linux
- Cybersecurity
- Hardware Configuration
- Software Installation
- Communication: Clear Expression
- Time Management: Organization Skills
- Leadership
- Critical Thinking
